

# Anthony Dell'Anno

---

Junior web developer with a passion for creating and building new things. Self-taught to code at first, I recently graduated from Makers Academy. I am now seeking full-time employment as a junior developer in an established company where continued learning is supported and encouraged.

## Code Examples

---

Project Name (links will take you to codebase/live demo)	Description
<a href="#">Rails-Messenger(codebase)</a> <a href="#">Rubygems.org(download page)</a>	A published Ruby Gem that provides messaging capabilities between users on Rails applications.
<a href="#">Hot, Hot, Cold (codebase)</a> <a href="#">Live Demo</a>	A mobile based location game, developed using Javascript with a Firebase database and Ionic, where users have to locate checkpoints across London using their GPS and cryptic clues.
<a href="#">Interactive Thermostat/Weather Forecast (codebase)</a> <a href="#">Live Demo</a>	A duplication of a home thermostat and makes use of the Google API & OpenWeatherMap API to provide real time weather forecasts

## Skills

---

- Adaptable and a quick learner. I graduated with a degree in Contemporary History in 2011 and now in a relatively short space of time I have taught myself to code using my own resources as well as those provided at Makers Academy.

- Desire to code and keep coding! I built my first "Hello world" website in HTML and CSS one year ago which set me on this new career path. The last year of coding has been a hugely exciting period for me and I can't wait to continue the journey.
- Well written and great communication skills. If my degree in History has taught me anything, it taught me how to write well and be a great communicator, a skill highly valued in all team projects!

	<b>Comfortable</b>	<b>Know</b>	<b>Touched on</b>
Languages	Javascript, Ruby, CSS3, HTML5	JQuery	Coffeescript
Databases	PostGresQL, Firebase	DataMapper	MongoDB
Frameworks	AngularJS, Ruby on Rails, Sinatra	Foundation	Ionic, Meteor, NodeJs
Testing	Jasmine, Rspec, Capybara	Jasmine, Karma	Factory Girl
Other	Git Version Control	Heroku	

## Education

### Makers Academy (September 2015 to November 2015)

A selective 12 week intensive coding bootcamp.

- Daily pair programming with a new partner.
- Test driven development was encouraged/enforced from the get go.
- Focus on object oriented programming, agile development and other best practices.
- Experience working in team projects of 4-5 members, building MVP's quickly and working to deadlines.

**University of Sussex (September 2008 - July 2011)**

BA Contemporary History

**Richmond Upon Thames College (September 2006 - July 2008)**

A-Levels: Economics, History, English Language, Psychology
